

### Project types

- Libraries
- Convention centers
- Airports
- Police and fire stations
- Corporate headquarters
- Suited office buildings
- Hotels and restaurants
- Water parks
- Mixed-use developments
- Parking structures
- Residential condominiums
- Retail centers

## Enhance experience and maximize operational efficiencies for a higher return on investment

By constantly monitoring engineering trends and developments, Arnold & O'Sheridan's engineers improve facility performance and cut long-term operating costs through ingenuity and innovation. Expertise rooted in decades of private and public projects enables us to support distinctive architecture with proven best practices and inspired thinking. Our emphasis on P3xcel sustainable design further guides our recommendations towards energy conservation and environmentally sensitive strategies that enhance the places people live, work, shop and play. As a result, corporate, commercial and civic organizations enhance their presence and market share to capture a higher return on their investment.

Arnold & O'Sheridan offers a comprehensive suite of engineering disciplines, including civil and structural, MEP, and technology and security. From master planning mixed-use developments to designing the technology platforms that underpin regional airports, we offer a single source for integrated engineering design.
